

AirControls

Your Single Source Supplier

- Quiet and reliable air control
- Cyclone jet technology ensures fast, easy installation
- Air control handle designs are interchangeable so you can swap out customized orders
- Custom finishes available to complement jets for a consistent spa design

AirControls

Quiet, reliable air controls are easy to install and operate.

Our high volume air control's fast installation, long service life, and small profile will win you over. Users will appreciate its stylish, new appearance, quiet operation and ergonomic handle.

- Designed for maximum vacuum to deliver optimized air flow through jets and eliminate "whistling" during operation for a more enjoyable spa experience.
- New, ergonomically designed handle in contemporary Sapphire design makes flow adjustments effortless for all spa users. Sapphire design is also available in diverter valves.
- Sapphire handle fits into smaller recesses freeing up more bar top space; full and half grip handles are also available.
- Cyclone jet technology ensures fast, easy installation.
- Tight dimensional tolerances on all parts prevent creeping of handle adjustment.
- Snap-fit makes installation and service a breeze; air control handle designs are interchangeable so you can swap out for customized orders.
- Blower assist tee is available for full foam spa installations.
- Looks, colors and finishes available to complement jets for a consistent spa design. Color selections include gray, silver and dark gray.

Customization to match any vision

To help you differentiate your products and achieve the unique style you envision, we are pleased to offer custom design and engineering capabilities. Whether you require special design, color or finish, we are ready and able to assist you. Contact us with your special requirements.
