- Features a generous 11 kW heater (also available in gas ready version)
- Added electrical features support more powerful pumps
- Water-proof enclosure for maximum protection
- Supports our ML panel line-up
- UL and CSA approved

BALBOA
water group

Balboa Swim Spa

Balboa Swim Spa caters to the spa designed for sport or leisure. Our controls feature an 11 kW heater or natural gas version. The Balboa Swim Spa controls up to four pumps and a multi-speed blower.

As part of our Elite series of spa controls, the swim spa was designed using our patented M7 temperature and water flow sensing technology. The universal control platform offers feature flexibility unlike any other system available in the market today.

Contact your BWG representative today to find out more about our Swim Spa controls.
