The Budget Snap-In Series Jets

The Budget Snap-In series was developed to deliver maximum results with fewer parts and installation headaches. With the Budget series there is nothing to mount, which results in fewer parts and a more reliable product. Jet faces "snap" into place, allowing for the easiest installation possible.

The Budget Snap-In Jet Series is available with a variety of body styles, allowing you, as the customer, to choose from a directional eyeball and escutcheon assembly or a pulse internal assembly.
